ABOUT ME

Full Stack Developer with 3+ years of experience building and maintaining web applications from front-end UI through back-end APIs and database design. Skilled in JavaScript, TypeScript, React, Angular, Node.js (Express/NestJS), Python, SQL, and NoSQL databases. Known for integrating third-party APIs, translating complex technical work into business value, and collaborating across development, design, and stakeholder teams to deliver reliable, scalable software.

PROFESSIONAL EXPERIENCE

LEAD SOFTWARE DEVELOPER | MobileDash

09/2023 – 03/2026

- Led a full stack development team building two parallel applications — a legacy system and a new Oracle Apex platform — spanning front-end UI, REST API development, and database architecture.
- Integrated the Intuit API end-to-end to enable in-app invoicing and payment processing, implementing OAuth 2.0 token acquisition and automated token renewal to maintain secure, uninterrupted user sessions.
- Designed and implemented the SQL database architecture for the Oracle Apex application, creating schemas and complex queries to support multi-entity project data at the scale of construction work order management.
- Built and maintained RESTful APIs and server-side logic using Node.js with Express and NestJS, integrating front-end clients with third-party services and back-end business logic.
- Integrated external APIs to capture user IP address and consent metadata for terms and conditions compliance, ensuring accurate audit trails for legal and regulatory purposes.
- Maintained MongoDB schemas and optimized queries on the legacy production application, supporting thousands of document retrievals across diverse query types with minimal downtime.
- Maintained and extended Angular components and features across the legacy application, ensuring UI stability and consistency during active parallel development.
- Served as primary technical liaison between development, design, and business stakeholders — translating feature requirements into technical plans, evaluating trade-offs, and communicating pros and cons of new features in non-technical terms to support business decisions.
- Reviewed, approved, and merged GitHub pull requests; conducted code reviews to enforce quality standards and maintainability across the team.
- Participated in daily Agile/Scrum standups, tracking progress and surfacing blockers to keep cross-functional teams aligned.

DEVELOPER INTERN | The Church of Jesus Christ of Latter-day Saints

01/2023 – 04/2023

- Contributed to a large-scale application querying millions of documents, building features that handled diverse query types with high reliability.
- Developed front-end and back-end features using Angular, Node.js, SASS, TypeScript, and Maven within an Azure DevOps CI/CD pipeline.
- Wrote and managed Jira bug, story, and feature tickets; performed requirement elicitation to clearly define scope for other developers.

- Conducted QA on user-based bug fixes and new feature releases; helped review and approve GitHub pull requests.
- Upgraded Node dependencies (Bootstrap, Angular, and others) and reported on progress in daily Agile standups.

CAD DRAFTER | HLE Inc.

02/2021 – 10/2022

- Drafted plans for surveyors and civil engineers using Civil3D, collaborating with state and local jurisdictions to meet regulatory requirements.

CONSTRUCTION ESTIMATOR | Mickelsen Construction Inc.

03/2020 – 02/2021

- Created civil estimates and Excel-based calculation tools to support vendor negotiations and project bidding.

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, HTML, CSS/SASS/SCSS, React, Angular, Bootstrap
Backend	Node.js (Express, NestJS), Python, Java, RESTful API Design, GraphQL, OAuth 2.0 & Security, Swagger API
Databases	SQL (Oracle Apex, MySQL, PostgreSQL, SQLite, MS SQL Server), MongoDB (NoSQL)
API / Integrations	Intuit API (payments/invoicing), IP geolocation APIs, third-party REST integrations
DevOps & Tools	Git / GitHub, Docker, Azure DevOps (CI/CD), Jira, SaaS, Bash Script, Render
Testing	Playwright (E2E testing), utPLSQL (Unit testing), Jest (Unit testing)
Other Languages	PL/SQL, C++, Kotlin, Swift, Rust, VBA
Soft Skills	Cross-team communication, Leadership, Adaptable, Give me a problem and I will find a solution, Attention to Detail, Agile/Scrum, Code Review Bilingual (Spanish)

EDUCATION

Bachelor of Science in Software Engineering

Emphasis in Web Development and Software Design

Brigham Young University – Idaho | Graduated July 2023
